## Career Objective

Motivated Computer Science graduate with strong programming and full-stack development skills, seeking a software engineering role to contribute to innovative projects and grow with a dynamic organization.

## Education

**SR University, Warangal** — **Aug 2023 – Apr 2026**
B.Tech in Computer Science — CGPA: 9.0/10.0

**Government Polytechnic, Warangal** — **Sep 2020 – Apr 2023**
Diploma in Computer Science — CGPA: 9.74/10.0

**St. Joseph Convent High School, Warangal** — **2019 – 2020**
Secondary Education (SSC) — CGPA: 10.0/10.0

## Experience

**LLM Post Trainee Intern** — Ethara AI — Feb 2026 – Present

- Evaluated AI-generated text, image, audio, and video outputs using structured quality metrics such as instruction following, accuracy, groundedness, and completeness to ensure high-quality model performance.
- Delivered generalist tasks including prompt engineering, annotation, visual description, and comparative analysis with evidence-based justifications, collaborating within team workflows to identify model gaps and enhance reliability.

**Python Trainee** — Softwayz IT Solutions — Dec 2022 – May 2023

- Practiced Python programming and gained exposure to SQL, web development, and core CS concepts.
- Strengthened problem-solving and software development skills through structured exercises.

## Projects

**UniEase – Unified Campus Life & Academic Assistant** — Django, MySQL, HTML, CSS, JavaScript

- Developed a unified full-stack campus platform to streamline academic, campus service, and placement processes.
- Designed modular components with relational database models to manage academics, services, and career workflows.
- Implemented role-based authentication and secure backend logic using Django ORM.

**Deepfake Detection & Attribution System** — Python, PyTorch, TensorFlow, CNN, XceptionNet

- Developed multi-modal deepfake detection for images, audio, and video (99% image, 98% audio, 86% video accuracy).
- Used XceptionNet with attention for image artifacts, MTCNN for face detection, mel-spectrograms for audio, and 3D CNNs for video.
- Deployed the system on Hugging Face for real-time inference.

**Online Invoice Generation System** — Java, JSP, Servlets, MySQL

- Developed a full-stack invoicing system with multi-user roles, product/customer management, and PDF invoice downloads.
- Managed moderate to large datasets efficiently using MySQL and optimized JSP/Servlet logic.
- Enhanced navigation and validation for better usability.

## Technical Skills

**Programming Languages:** Python (Primary), Java, C++, C#
**Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems
**Web Development:** HTML, CSS, JavaScript, Django, REST APIs, MERN
**Databases:** MySQL, MongoDB
**AI/ML (Fundamentals):** Machine Learning, Neural Networks, Computer Vision, NLP
**Tools & Platforms:** Git, GitHub, Linux, AWS, Google Colab, Postman

## Soft Skills

Problem-Solving, Teamwork, Clear Communication, Adaptability, Willingness to Learn

## Languages

English (Fluent), Hindi (Fluent), Telugu (Native), Spanish (Basic)

## Certifications & Courses

**Certified System Administrator** – ServiceNow [View]
**Theory of Computation** – NPTEL [View]
**Cloud Virtual Internship** – AWS (AICTE-Eduskills) [View]
**Data Structures and Algorithms** – UC San Diego (Coursera) [View]
**Full Stack Web Development with AI Tools** – EY, Edunet Foundation & TASK [View]
