GitHub | LinkedIn | LeetCode | Portfolio | Credly

Summary

Computer Science graduate with a strong academic foundation and hands-on experience developing software solutions across full-stack and AI-driven projects. Demonstrates strong problem-solving ability, technical adaptability, and a collaborative approach, with a keen interest in building reliable, impactful technology solutions.

Education

SR University, Warangal B.Tech in Computer Science and Engineering	Aug 2023 – Apr 2026 CGPA: 9.1/10.0
Government Polytechnic, Warangal Diploma in Computer Science	Sep 2020 – Apr 2023 CGPA: 9.74/10.0

Technical Skills

Languages: Python (Primary), Java, C++, C#, C, SQL
CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Web & Backend: HTML, CSS, JavaScript, Django, REST APIs, MERN Stack, MySQL, MongoDB
AI/ML (Foundational): Machine Learning, Deep Learning, NLP, Computer Vision, CNNs, LLMs, RAG, Data Analysis
Practices & Tools: Git, GitHub, Linux, AWS, Postman

Experience

LLM Post-Training Intern — Ethara AI	Feb 2026 – May 2026
- Benchmarked multimodal generative AI outputs against quality standards, translating nuanced judgments into structured, evidence-based feedback that shaped model refinement. - Combined prompt engineering with fine-grained data annotation across visual and audio-visual content to strengthen training data quality, collaborating with a cross-functional team to streamline evaluation workflows.	
Python Development Trainee — Softwayz IT Solutions	Dec 2022 – May 2023
- Completed a 6-month traineeship building Python programs applying core data structures and OOP concepts, with hands-on exposure to SQL and web development fundamentals. - Practiced structured coding exercises and followed defined coding standards, strengthening debugging and problem-solving skills.	

Projects

UniEase – Unified Campus Life & Academic Assistant — Django, Python, MySQL, JavaScript	GitHub
- Built a full-stack platform unifying campus academics (notes, timetables, syllabus tracking, exams, performance insights), student life (lost & found, hostel complaints, mess, transport, doubt forum), and growth (placements, learning resources, academic vault) into one system. - Implemented role-based dashboards for students, faculty, and admins with secure authentication, a relational MySQL database, and custom admin tools for announcements and exam management.	
Deepfake Detection & Attribution System — Python, PyTorch, TensorFlow, CNN	GitHub
- Collaborated with a team to build a multi-modal deepfake detection system for images, audio, and video, achieving 99% image, 98% audio, and 86% video classification accuracy; personally collected and curated the training dataset. - Built and trained the image-classification model using CNNs to detect visual manipulation artifacts, and deployed the complete system on Hugging Face for real-time inference.	
Sign Language Recognition using CNN — Python, TensorFlow, Keras, OpenCV	GitHub
- Built a CNN-based gesture recognition system that classifies hand gestures from live webcam input to recognize everyday phrases, aiding communication for speech- and hearing-impaired users. - Curated and labeled a custom gesture-image dataset, and trained/tuned the model using TensorFlow and Keras to improve real-time recognition accuracy.	

Additional Information

Achievements: Solved 290+ coding problems on LeetCode and GeeksforGeeks, primarily using Python and SQL.
Soft Skills: Problem-Solving, Teamwork, Clear Communication, Adaptability, Willingness to Learn
Languages: English (Fluent), Hindi (Fluent), Telugu (Native), Spanish (Basic)

Certifications & Courses

Certified System Administrator – ServiceNow	[View]
Theory of Computation – NPTEL	[View]
Cloud Virtual Internship – AWS (AICTE-Eduskills)	[View]
Data Structures and Algorithms – UC San Diego (Coursera)	[View]
Full Stack Web Development with AI Tools – EY, Edunet Foundation & TASK	[View]
